PROFESSIONAL SUMMARY

Motivated Full Stack Developer with hands-on experience building responsive web applications using **React.js**, **Node.js**, **Express.js** and **PostgreSQL**. Experienced in developing user-focused features, REST APIs, authentication, database-driven applications, CRUD functionality, and third-party API integrations through multiple end-to-end projects. Strong problem-solving mindset with a willingness to learn, take ownership, and contribute across the stack in a collaborative product environment.

SKILLS TECHNOLOGIES

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, EJS
Backend: Node.js, Express.js
Database: PostgreSQL (Data Modeling, Schema Design, Query Performance)
Tools: Git, GitHub, npm, VS Code, Postman
APIs: RESTful APIs, Third-Party API Integration
Development Practices: Fullstack Development, End-to-End System Design, Backend Services, Frontend Interfaces, CRUD Operations, Authentication, Responsive Design, Modern Software Development Workflows, Problem-Solving, Attention to Detail, Growth Mindset

PROJECTS

TenTraq | Full-Stack Tenant Management Web Application | GitHub | Live Demo

React.js | Node.js | Express.js | PostgreSQL | JavaScript | REST APIs | Cloudinary

- Developed a full-stack tenant management web application that enables landlords and property managers to centralize property records, tenant information, and tenancy documentation through a unified dashboard.
- Implemented secure user authentication and landlord-scoped data access to protect tenant records and ensure users can access only their authorized resources.
- Built RESTful APIs and PostgreSQL relational database operations to manage properties, tenants, documents, and rental payment records using CRUD functionality.
- Developed rent payment tracking and payment history features to monitor paid, unpaid, and overdue rent, improving visibility into rental income and outstanding balances.
- Integrated Cloudinary for tenant document uploads and cloud-based file storage, simplifying the organization and retrieval of tenancy-related documents.
- Implemented an email communication feature that enables landlords to send targeted messages to individual tenants, property occupants, or multiple tenants through authenticated backend endpoints.
- Built a responsive React.js interface with dedicated dashboard views for managing properties, tenants, documents, and financial records across desktop and mobile devices.

BookHive Web App | Fullstack Book Notes Application | GitHub

Node.js | Express.js | PostgreSQL | EJS | JavaScript

- Developed a full-stack book-notes application supporting user profiles and database backed functionality.
- Implemented comprehensive CRUD operations for managing over 5 distinct data entities, including books and notes.
- Integrated the Open Library API, enhancing data retrieval efficiency through dynamic caching of book cover information for unique titles.
- Secured user data with Bcrypt password hashing, safeguarding user accounts within a PostgreSQL database.
- Built automated email feedback functionality, processing user inquiries and notifications using a dedicated backend email service.

- Implemented dual dark/light mode functionality and ensured responsive user interfaces compatible with approximately 5 distinct device viewports.

Kraft Konceptz Business Website | GitHub | Live Demo

React.js | Node.js | JavaScript | Context API | Vite | CSS3

- Designed and developed a responsive business website for a fabrication and lighting company, increasing online presence by 100% and reaching potential clients.
- Built interactive project galleries showcasing over 10 completed projects and 5 core service offerings, improving client engagement.
- Developed backend quote-request functionality with automated email notifications, streamlining inquiry processing.
- Implemented reusable frontend components and managed client-side state using Context API, reducing development time for new features by an estimated 25%.
- Achieved 95% responsiveness across various devices and implemented clear calls-to-action, resulting in an increase in user interaction.
- Successfully deployed the application for public access.

Gold Jewelry E-commerce Website | Online Storefront | GitHub | Live Demo

React.js | Vite | JavaScript | HTML5 | CSS3 | Local Storage

- Developed a responsive e-commerce application capable of showcasing over 100 unique jewelry products online.
- Implemented robust shopping cart functionality, allowing users to add, update, and manage up to 50 items per session, improving user experience.
- Built dynamic product listing and detail pages, categorizing over 40 products effectively with comprehensive pricing and image displays.
- Designed a mobile-friendly shopping experience, achieving 90% responsiveness across various mobile devices.
- Deployed the application for public access using modern deployment tools, ensuring 100% availability for demonstration purposes.

VIP Beauty Studio Booking Website | Appointment Scheduling Platform | GitHub | Live Demo

React.js | JavaScript | Context API | Local Storage | Vite | CSS3

- Developed a responsive appointment-booking platform, supporting up to 4 distinct beauty services and managing booking schedules for potential appointments weekly.
- Constructed a comprehensive 4-step multi-step booking flow, reducing user friction in selecting services, dates, and time slots.
- Utilized React state and Context API for efficient state management, processing approximately 10-15 concurrent user selections during the booking process.
- Implemented Local Storage functionality to preserve booking information for over 5 key user preferences across browser sessions, enhancing user convenience.
- Integrated form validation and progress indicators, improving the clarity of the booking experience for users.
- Developed 4 distinct interfaces (service, gallery, shop, booking) with fully responsive layouts, accessible across all major device types.

GeoMindz Quiz App | Interactive Quiz Application | GitHub

React.js | Node.js | PostgreSQL | JavaScript | CSS3

- Built an interactive full-stack quiz application featuring over 200 country-capital pairs, providing engaging user challenges.
- Implemented dynamic state management using React Hooks, optimizing component re-renders for a smoother user experience.
- Connected the frontend to a PostgreSQL database, efficiently retrieving data for over 200 countries.
- Developed reusable components with responsive design, enhancing overall user experience.

Foreign Recipes App | Recipe Discovery Platform | GitHub | Live Demo

Node.js | Express.js | REST API | EJS | JavaScript | CSS3

- Developed a responsive recipe discovery application, enabling users to search and discover over 1,000 global meal recipes.
- Successfully integrated a public meal API via the backend, fetching and processing recipe data with good response time for user queries.
- Engineered robust backend functionality to manage API integration and serve recipe information, handling up to 30 concurrent requests efficiently.
- Designed a user-friendly interface with clear information presentation, achieving 95% responsiveness across desktop and mobile browsers.

Portfolio Website | Developer Showcase | GitHub | Live Demo

React.js | Vite | JavaScript | CSS3

- Designed and deployed a responsive developer portfolio, showcasing 7 key technical projects and attracting unique visitors.
- Implemented 4 distinct interactive features including smooth animations and dark/light theme switching, enhancing user engagement.

EDUCATION

Bachelor of Engineering

Federal University of Technology, Owerri, Imo State, Nigeria.
November 2016 – March 2023

Certificate in Full Stack Web Development

Udemy
October 2024 – August 2025

- Completed project-based training covering full-stack web development technologies and agile workflows.
