PROFESSIONAL SUMMARY

Motivated Full Stack Developer with a strong foundation in React.js, Node.js, JavaScript, PostgreSQL and other modern web technologies gained through an intensive coding bootcamp and multiple self-initiated projects. Skilled in designing and developing responsive, user-focused web applications using modern Frontend and Backend frameworks to create seamless digital experiences for users. Eager to contribute my technical expertise, problem-solving skills, and a growth mindset to a dynamic software development team.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, EJS

Backend: Node.js, Express.js

Database: PostgreSQL

Tools & Platforms: Git/GitHub, REST APIs, npm, VS Code, Postman

Other: Responsive Design, Authentication, Deployment (Vercel /Netlify)

PROJECTS

Kraft Konzeptz Website | *React.js, Node.js, Context API, JavaScript, Local Storage, Vite, CSS3*

- Designed and developed a responsive business website for a fabrication and lighting company to showcase its services, completed projects, and technical capabilities.
- Built interactive project galleries highlighting services such as signage installation, CNC fabrication, LED screens, RGB lighting, and custom fabrication.
- Integrated backend request form submission and email notifications for clients' custom quotes.
- Focused on performance, accessibility, and a seamless user experience across different screen sizes.
- Implemented clear navigation and call-to-action sections to improve service discovery and encourage client inquiries.

Gold Jewelry E-commerce Website | *React.js, Vite, JavaScript, Local Storage, HTML, CSS3*

- Developed a responsive e-commerce website for a gold jewelry business to showcase and sell jewelry products online.
- Implemented shopping cart functionality to enable users to add, update, and manage selected products.
- Integrated a secure online payment solution to support smooth and convenient customer transactions.
- Built product listing and product-detail pages with organized categories, pricing, images, and detailed product information.
- Designed a modern, mobile-friendly interface that delivers an engaging shopping experience across devices.

VIP Beauty Studio Booking Website | *React.js, JavaScript, CSS3, Context API, Local Storage, Vite*

- Developed a responsive beauty service booking platform that allows customers to browse services and schedule appointments online.
- Built a multi-step appointment booking system for selecting service categories, specific services, preferred dates, and available time slots.
- Implemented booking data management using React state and Context API to maintain user selections throughout the booking process.
- Integrated local storage to preserve booking information across page navigation and browser sessions.
- Developed service, gallery, shop, and booking pages with responsive layouts and an intuitive user experience.
- Created a structured booking flow with progress indicators and validation to improve appointment completion.

BookHive Web App | *Node.js, Express.js, PostgreSQL, EJS*

- Built a full-stack book notes web application with user authentication and profile pages.
- Implemented CRUD operations, dark/light mode, and feedback automation via email.

- Integrated Open Library API for book cover fetching and caching.
- Hashed users' passwords with Bcrypt and stored all relevant data on PostgreSQL Database.

Foreign Recipes App | *Node.js, REST API, Express.js, EJS, JavaScript, CSS3*

- Built a user-friendly and responsive recipes web app that lets users search for global foreign recipes.
- Integrated a public meal API at the backend to fetch meals data.
- Optimized the UI/UX for a seamless web experience.

GeoMindz Quiz App | *React.js, PostgreSQL, CSS3, Node.js*

- Interactive full stack quiz application that challenges users to match countries with their capitals.
- Developed with dynamic state management using React Hooks.
- Focused on clean UI/UX, responsiveness and reusability of components.
- Implemented display of countries dynamically from PostgreSQL Database.

Portfolio Website | *React.js, Vite, CSS3*

- Designed and deployed a modern, responsive developer portfolio.
- Features include smooth animations, dark/light theme toggle, typed javascript effect and a back-to-top button.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering | Federal University of Technology,
Owerri, Imo State.

November 2016 – March 2023

Udemy | Certificate in Full Stack Web Development

October 2024 – August 2025

- Completed an intensive online bootcamp covering full stack technologies, project-based learning, and agile workflows.
